

Dynamon Support for Scottish SME HGV Fleets

Access £1 million funding to plan your transition to zero emission trucks

Transport Scotland has launched a £1M fund to support Scottish SME HGV fleets in understanding and planning their transition to zero emission HGVs. This is part of the new HGV Market Readiness Fund aimed at boosting market confidence and reducing emissions.

How Dynamon Can Help:

Funding Application Support

Applying for public funding can be unfamiliar – we make it simple. We've helped fleets successfully secure funding before, and we'll guide you through the process.

Fleet Decarbonisation Report

Get a tailored plan showing which vehicles can switch to EV now, how duty cycles will be impacted, and where charging will be needed.

Site Survey & Grid Assessment

Accurate on-site surveys to understand grid availability, charging needs and infrastructure design – critical for planning your next steps.

Funding Deadline

This support is available now, but funding is limited. Early application is strongly encouraged.

Let's get your fleet started. Get in touch:
